

TEAM 7

1.Service

-CYCLETRONIC

2.Function

-SAVE THE STUDENT TIME

3.Target Customers

-PMJ STUDENT

4.Visual Aids

- POSTER,SOCIAL MEDIA

STRUCTURES:

1.Introduction

- Student find it hard to go class
- Cycletronic that give bike service

2.Main Point 1 (AZLINAH)

Issue: Normal bike is tiring

Features: Electric bikes are equipped with a battery-powered “assist” through pedaling or a throttle

Benefits: Electric-Bike is cheaper and faster than a car or other transport

Comparison:

CYCLETRONIC	BEAM
-Cheaper cost	-Very expensive cost
-Can be used anytime	-Have time to use

3.Main Point 2 (HAZRIQ)

Issue: Normal bike is heavy for some people

Features: Fix weight

Benefits: Easy to use

Comparison:

CYCLETRONIC	BEAM
-easy to use	-difficult to use

-have two handle brake	-only have one handle brake
------------------------	-----------------------------

4.Main Point 3 (KABILASHA)

Issue: Normal bike use a lot of energy to cycle it

Features: Pedal assisted, its an exercise and good for your health, both mentality and physically

Benefits: Improve fitness

Comparison:

CYCLETRONIC	BEAM
-Higher speed	-Low speed
Have throttles,pedal assisted	-Have throttles but not pedal assisted

5.Main Point 4 (DEVESHWAR)

Issue: Bike sizes that mostly big

Features: Most e-bikes can be fold in half, which makes it portable and convenient

Benefits: Less money consmption on feul, can save money because the bike is electric

Comparison:

CYCLETRONIC	BEAM
-Has built in GPS system	-No GPS system
-Can be found in many place	-Only limited in certain areas

6.Conclusion

-The electric bike very helpful for all students

-Students can save money every semester by using an electric bike
